EXPERIENCE

SDE Intern @ Inxtinct Security ↗

Dec 26 – May 26

London, UK – Remote

- Built a **multi-tenant LMS platform** ↗ (Next.js, Sanity CMS) serving **500+ active users**; **40+ REST APIs** with **RBAC**, **JWT auth**, and **rate limiting**; integrated **AWS S3** for image storage and **Mux signed playback** for enrollment-gated video delivery.
- Engineered a **gamification engine** (points, streaks, weekly leaderboards) with **idempotent** bonus awards and **cron-based** weekly resets.
- Developed **Osiris Super Admin** – a cross-org control panel (Next.js, TypeScript, Prisma, Sanity) for Inxtinct's **email-security platform**; surfaces unified threat analytics and a geo-origin heatmap, and ships tenant onboarding, **TOTP 2FA** step-up auth, and allowlist-gated **Microsoft SSO**.
- Deployed and maintained production on **AWS EC2**; automated releases via **CI/CD pipelines** (GitHub Actions) enforcing security best practices end-to-end.

Developer @ Chain Salad

May 26 – June 26

Bangalore, India – Onsite (Part Time)

- Shipped **Socket** ↗ – a commercial **AI copilot Blender addon** that reads live **Geometry Nodes** scene context and suggests fixes through chat; designed a **pluggable 3-backend LLM layer** (**OpenRouter API**, local **llama.cpp**, and a custom **MCP server** exposing Blender state as tools to **Claude Desktop**).
- Built a **digital storefront** (Next.js, Prisma, **PayPal**) with **idempotent webhook handlers**, **atomic DB writes**, and **S3 pre-signed** file delivery.

PROJECTS

EasyOps ↗ | *Python, FastAPI, React, LangGraph, PostgreSQL, pgvector, GitHub MCP* |

Mar 26 – Apr 26

- **Won 1st place (DevOps theme)** at **HackToFuture 4.0** (700+ teams) – an autonomous **CI/CD agent** (3 **LangGraph** workflows) that ingests **HMAC-verified GitHub webhooks**, traces CI failures via a custom **Repository Structure Index**, and auto-raises fix PRs with **loop-prevention** against self-triggering.
- Designed a **deterministic 0–100 PR scoring rubric** gating merges (auto-pass / **Telegram human-in-the-loop** approval / block), **pgvector episodic memory** (HNSW) recalling past fixes, and **fuzzy patch application** to make LLM code edits apply reliably; live **SSE** dashboard.

AI Compliance Checker ↗ | *Python, FastAPI, React, LangChain, ChromaDB, Redis, Supabase* |

Jan 26 – Mar 26

- Engineered a **multi-agent pipeline** (Orchestrator → Specialists → **Validator**) doing **vision-based extraction** of **22+ structural parameters** from **RCC drawings**, with a Validator pass that re-checks extracted values before they reach a verdict.
- Built **RAG** over unstructured **IS 456 / SP 34** standards (ChromaDB) to ground compliance verdicts in cited clauses and auto-generate **PDF reports**, cutting manual review time by **50%**.
- Productionized with **async job processing** (**Redis + RQ**, 202 + polling API with live progress) and **per-session rate limiting** (slowapi).

SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL — **Familiar:** Java, Rust, Solidity

GenAI & Agents: LangChain, LangGraph, **MCP (server + client)**, RAG, tool-calling, prompt engineering, ChromaDB, pgvector, Ollama, Hugging Face

AI Dev Tools: Claude Code, Cursor — **Frontend:** React, Next.js, Redux, Tailwind CSS

Backend: FastAPI, NodeJS, NestJS, ExpressJS, JWT, Redis — **Databases:** PostgreSQL, MongoDB, Supabase

DevOps & Cloud: AWS (S3, EC2, IAM, Bedrock), Docker, GitHub Actions, CI/CD — **Tools:** Git, GitHub, Postman

EDUCATION

National Institute Of Technology, Karnataka

Aug 2023 – May 2027

B.Tech in Civil Engineering, Minor in Information Technology

GPA: **8.37/10 (Major)**, **8.75/10 (Minor)**

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Machine Learning

Army Public School, Lucknow – Class XII (CBSE 2022) **90.2%** — Class X (CBSE 2020) **97.4%**

LEADERSHIP & INVOLVEMENT

HackToFuture 4.0 – Winner (DevOps Theme): 1st of 700+ teams for *EasyOps* ↗.

Web Head, NRL: Built and maintain the **official club website** ↗. — **PACE, NITK:** Leading technical club projects.

EthGlobal / EthOnline '25: Shipped *FitStake* ↗ (on-chain fitness staking) and *PokeWars* ↗ (on-chain RPG shooter with marketplace).
